

Pamphlet Stitch

.....

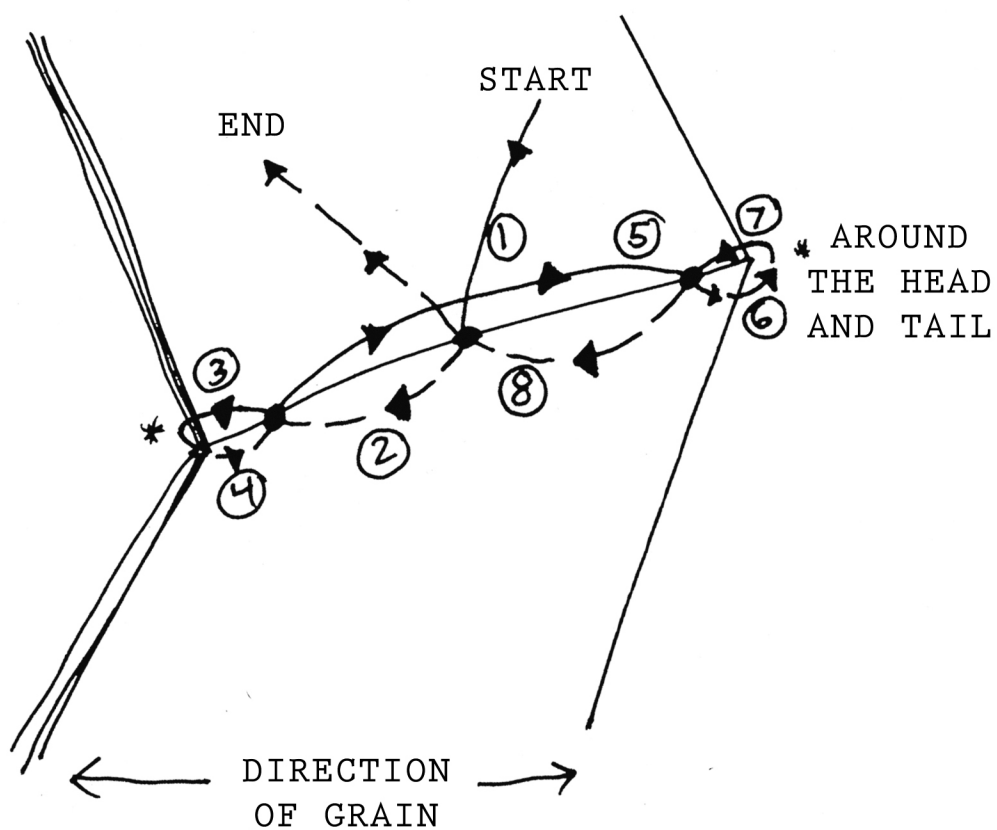

- Use lightweight paper (4-8 sheets)
- Fold the paper with the direction of the grain.
- The knot will be on the whichever side you begin stitching from (outside or inside)
- Pamphlet books can have an even number of holes, but generally they have an odd number (3, 5, 7, 9).
- Waxed thread should be 2 1/2 times the height of the pamphlet (5-hole variation needs more)
- Begin with the middle hole.
- Always tie the final reef knot (square knot) around the long central stitch.

... 3-Hole ...

..... 3-Hole Variation

..... 5-Hole
